About Argentine Tango

Argentine Tango is more than just a dance, it is a way of moving. It is a passionate and sensual communication between two people, a way of interpreting the music, of moving together, of expressing feelings. *Tango is improvised, so there are no sequences of steps that each dancer must learn by rote.* Instead, they learn to communicate with each other throughout every step of the dance. All you need to learn to dance Tango is the ability to walk, listen to the music and listen to your partner.
